

Light up the night with...

Questar[®]

Light up the night with Questar[®] Spotlight

Questar is designed to be the easiest spotlight that you ever use. Its aerodynamic, low profile design does not interfere with lightbar operation. In its stored position, it does not block the lightbar. Questar's unique dual bulb design and computerized reflector design enables you to light up the night with 300,000 candlepower. Its ergonomically styled pistol-grip handle rests close to the headliner when not in use. Simply pulling the handle down raises the light up for you. Questar has a waterproof double seal and a two-year guarantee.

- 360° continuous rotation for a smooth even illumination that never cuts out
- 300,000 candlepower provides a bright, even beam
- Dual bulb system allows the light to still operate even if one bulb fails
- Pistol grip handle is easy to use and folds safely into headliner
- Patented gearless operating system means no gears to strip or fail

Part Number CD-QS-1 & CD-QS-2

To operate Questar, pull the handle down

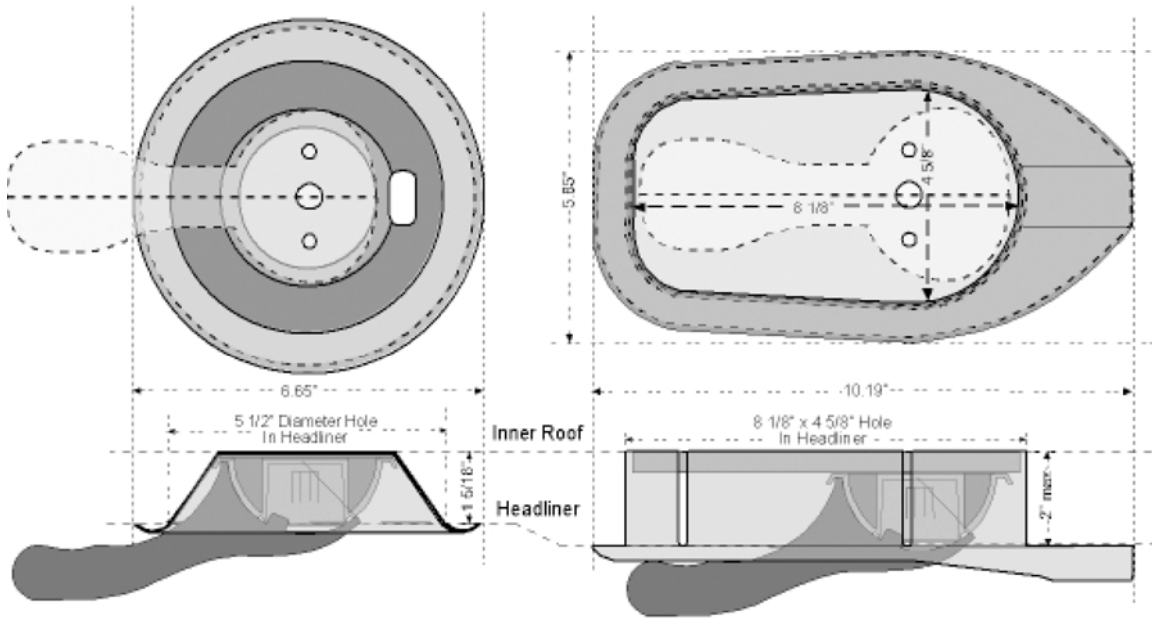

Part Number CD-QS-3 & CD-QS-4

Questar[®]

The CD-QS-3 & CD-QS-4 are designed for easy installation in vehicles with limited space, double steel roof construction, and in Ford F-250 through F-550 corrugated roofing.

Cutaway View of Trim Assembly

CD-QS-3 & CD-QS-4 Trim Bowl

- There is no switch mounted to trim bowl. A rocker switch is provided for remote location mounting.
- Vehicles with metal inner roof panels or hard board headliners can be cut out with a 5 1/2" hole saw.
- Trim bowl is not adjustable to depth. It is fixed at 1-5/16". A rubber trim bowl gasket is supplied to fill in any gap between the headliner and trim ring.

CD-QS-1 & CD-QS-2 Trim Grommet

- There is a switch mounted in trim grommet
- Trim grommet is adjustable from 3/4" to 2" depth. A rubber trim grommet gasket in both 1/4" and 5/8" thickness is supplied to fill in any gap between the headliner and trim ring.
