

Stalker PRO

The Stalker PRO is Used at the Olympics, Guinness Book of World Records, Wimbledon, ESPN, The World Series, ATP, Indy 500, NHL, NFL, NASA, & More!

3 Year Full Warranty

Designed to Be the Best

The Stalker Pro was designed to be the best radar gun in the world in terms of performance, quality, and features. It boasts the most sophisticated microwave systems in the industry, a high speed DSP computer utilizing elaborate target identification programming, and the most features ever stuffed into a radar gun. The Stalker Pro is the highest performance sports radar in the world by a wide margin.

Incredible Performance

The real draw of the Stalker PRO is its performance. The PRO is able to measure the speed of objects with true accuracy to 1/10th MPH, across a wide speed range, even when the objects are very far away. It can see cars well over a mile away, personal watercraft in excess of a quarter mile, and it can track pitches from most center field bleachers. The Stalker PRO can even pick off a mosquito from several feet away!

Ideal for Difficult Applications

The Stalker PRO can be used for any type of sport or testing application. The incredibly fast sample rate, high frequency, and extreme sensitivity, enable it to work in very difficult and unusual applications. This design provides exceptional performance for watercraft and snowmobile testing where water spray or snow dust render ordinary radar guns useless.

The Highest Performance

The Highest Performance Sports Radar

Twin Readout Windows

Separate Display for Peak Speeds

Upgradeable to STATS

Can be Upgraded to the Acceleration Testing System in the Future

20 Milliwatts of Power

The Most Powerful DSP Sports Radar

Ka Band Frequency

Reduced Interference and Superior Penetration Through Snow & Water Spray

SPECIFICATIONS

Accuracy	+/- 0.1 MPH
Speed Range	1-300 MPH
Target Acquisition Time	0.01 Seconds
Microwave System	Ka Band, 20 mw
Weight	3.0 Pounds
Display Units	MPH, KPH and Knots
Data Output	TTL Format
Warranty	3 Years Parts and Labor 90 Days on Batteries

Maximum Range (Est.)

Passenger Cars	6000 Feet Plus
Snowmobiles	2200 Feet
Watercraft	1300 Feet
Baseballs	400 - 450 Feet

Uncompromised Design

The Stalker Pro uses a patented, polarized twin horn, Ka band microwave system. This radical configuration eliminates some design compromises by utilizing separate horns for transmit and receive functions. The higher frequency Ka band channel gives the PRO advantages in signal processing, sample rate and moisture penetration, with fewer sources of interference.

This powerful and exotic Ka Band microwave system outperforms other radars by a wide margin.

The Best Sports Radar Money Can Buy

Continually Refined

Over the years, the Stalker Pro has gone through a process of continued improvement. Every circuit board has been redesigned at least once, and many components have been upgraded. This ongoing effort has kept the Stalker Pro the undisputed performance champion.

Chosen by Discriminating Major League Baseball Teams

Although most major league baseball teams like the simplicity of the Stalker SPORT, a number of teams use the PRO for advanced scouts and in player development. The twin readout display provides instant feedback on the difference between release and plate

speeds. Plus, the Ka band microwave system provides nearly total immunity from interference in most stadiums.

Demand Nothing Less

To some, this level of performance may seem to be overkill, but professionals who rely on their radar gun, and understand how important performance really is, demand nothing less.

"In the personal watercraft industry, nothing compares to the Stalker!"

Splash Magazine

"Now that our organization has fully phased in the Stalker Pro, our numbers have been extremely reliable and consistent. Plus, you have spoiled us with professional, responsive service."

Chuck McMichael, Scouting Director, Texas Rangers

"The range is so good on the Pro, I test all of my outfielder's arms from behind home plate."

Dean Bowyer, Head Coach MN State University

"This gun is so vastly superior, that a mere comparison seems unfair."

Contributing Writer for a Watercraft Magazine

Twin Readouts Show Both Current and Peak Speeds

The PRO features a nine button keypad and a backlit LCD screen with twin, four digit readouts. By using two separate speed displays running simultaneously, both the continuously tracked speeds and the peak speeds can be shown together. For baseball use, this system shows both the release speed and the plate speed together on every pitch. For vehicle applications, the separate display for peak speeds allows the operator to see how the peak speed compares to the continuously tracked readings.

Made in the **USA**

When Only the Best Will Do

The Stalker PRO is a professional instrument designed for the professional. With it's amazing performance, the PRO handles the most difficult applications with ease. It has quality, performance and joy of ownership second to none!

Stalker PRO

Includes:

- Stalker PRO Radar Gun Body
- One Ni-Cad Battery Handle
- Smart Charging System
- Calibration Verification Fork
- Deluxe Carrying Case (Choose between the locking suitcase and the custom padded soft case)

Optional Deluxe Accessory Kit

Stalker PRO Options:

- Upgrade Ni-Cad Battery to Ni-MH \$50.00
- Spare Ni-Cad Battery Handle \$75.00
- Spare Ni-MH Battery Handle \$125.00
- Deluxe Accessory Kit \$200.00

(Includes a spare Ni-Cad battery handle, tripod, and a locking mounting cradle)

Upgradeable to STATS \$1000.00

The Stalker Pro can be upgraded to the STATS Acceleration Testing System. The upgrade includes adding the RS-232 hardware and the Stalker ATS software program.
