A High Performance Radar

The Stalker SPORT combines a soft touch keypad with advanced digital signal processing and a powerful microwave system to create the world's leading high performance sports radar.

Three Times the Power

The microwave system on the Stalker SPORT is three times more powerful than any competing K band sports radar. This extra power provides for longer range, fewer missed targets, and greater consistency.

Dominating Professional Sports

The Stalker SPORT is the first choice of professional sports teams around the world. In fact, it's used by about 95 percent of the US major league baseball teams, and for most broadcasted baseball games and tennis tournaments.

What Do the Professionals Say About Stalker?

"We have found the Stalker to be a quality product, that is accurate, easy to use, and durable in the field. It's a product that I would recommend to anyone!"

Mike Arbuckle, Scouting Director, Philadelphia Phillies

"You have proven your commitment to both the quality of your product and the service you provide your customers. Our scouts have nothing but positive opinions of the Stalker Sport."

Matt Slater, Asst. Director of Scouting, Los Angeles Dodgers

"The Stalker has proved invaluable in demonstrating to our pitchers the importance of changing speeds. It gives them immediate feedback. I would highly recommend the Stalker to any coach or scout."

Tracy Smith, Miami University Athletics

"This gun just oozes quality!"

SPECIFICATIONS

Accuracy	+/- 0.1 MPH
Speed Range	5-250 MPH
Target Acquisition Time	0.046 Seconds
Microwave System	K Band, 15 mw
Weight (Cordless Version)	2.5 Pounds
Display Units	MPH and KPH
Data Output	TTL Format
Warranty	2 Years Parts and Labor 90 Days on Batteries

Maximum Range (Est.)

Passenger Cars	5500 Feet
Snowmobiles	1800 Feet
Watercraft	1000 Feet
Baseballs	300-350 Feet

Recommended for Pro Baseball Scouts

Professional baseball scouts often need to sit more than 200 feet away from the pitcher. Thanks to having three times the power of any competing radar gun, the Stalker SPORT is able to consistently measure the ball speed at the moment the ball leaves the pitcher's hand, up to 350 feet away! No other radar gun on the market can actually achieve that level of performance – regardless of their claims.

Warranty**

The World's Most Popular High Performance Sports Radar

Accurate to 1/10th MPH

The 4 digit, liquid crystal display (LCD) shows the speed to 1/10th MPH (or KPH). The display "icons" confirm various settings and operational status. The LCD provides high contrast daytime readability, while the backlighting provides excellent night viewing.

Reads Baseball Release And Plate Speeds

When tracking pitches, a peak speed setting will show the "out of the hand" reading. This is the most consistent and common place to measure the speed. If you want to see what the speed was as it crossed the plate, just turn off the peak hold. After the pitch, you can "toggle" back and forth between peak and plate speeds to view both.

Automatic Top Speed Lock

The Peak Hold feature allows the gun to automatically hold or recall the peak speed. It keeps both the continuously tracked speeds, and the peak speed in memory. Even after a tracking, you can refer back to see the peak speed or the last speed.

Corrugated Storage Case

Deluxe Lockable Carrying Case

Full Featured Display and Keypad

The SPORT uses a 7 button, soft-touch keypad which provides simple access to it's many features. Each button does one clear, logical function, so even people who have never used a radar gun before, can operate the SPORT without any instruction. The industry exclusive feature "memory recall," enables the SPORT to retrieve and display from memory the peak speed or the last recorded speed.

Power	Turns the gun on and off
Self Test	Performs a full self diagnostic and calibration test
X-Mit/ Hold	Turns the transmitter on or off (like the trigger)
Peak Hold	Shows the peak speed
Range	Adjusts the sensitivity
Setup Menu	Selects between popular applications
Recall Speed	Recalls from memory the last or peak speed

An Exceptional Value

The Stalker SPORT is for customers who understand that the best value is the product that offers the best combination of performance, quality and price. The SPORT clearly reflects the best value in sports radar.

Stalker Sport Corded Base Package

Base Package (CORDED)

- Stalker Sport Radar Gun Body
- Corded 12 VDC Handle
- Calibration Verification Fork
- Corrugated Carrying / Storage Case

Base Package Option:
3 Ah Portable Battery Pack
Upgrade to the Display Handle

(This allows the Sport to communicate to display boards)

Stalker Sport Cordless Base Package

Base Package (CORDLESS)

- Stalker Sport Radar Gun Body
- Cordless Ni-Cad Battery Handle
- Smart Charging Platform
- Calibration Verification Fork
- Corrugated Carrying / Storage Case

Options:
Upgrade the Ni-Cad Battery to Ni-MH
Spare Ni-Cad Battery Handle
Deluxe Accessory Kit

(Includes a spare Ni-Cad battery handle, tripod, and a locking mounting cradle)

Stalker Sport Premium Package

Premium Package (CORDLESS)

- Stalker Sport Radar Gun Body
- Double Capacity Ni-MH Battery Handle
- Smart Charging System
- Calibration Verification Fork
- Deluxe Lockable Carrying Case

**Spare Ni-MH Battery Handle
RS-232 Data Port**

(The data is not chronograph synchronized and is not compatible with the ATS software program)
