

The smallest, brightest 1 oz. LED flashlight available.

This tiny LED flashlight from Streamlight® is super bright, tough, and remarkably handy. It's so compact, you can carry it with you at all times. And it's very powerful. It offers a spot-to-flood beam, 400% more lighting range than a penlight, and reflector optics that enhance the brightness of the LED (lighting two to three times the range of other keychain lights without optics).

Streamlight flashlights are legendary for their dependability, and the Key-Mate® is no exception. Its high-intensity, state-of-the-art LED lasts 100,000-hours, and the anodized, machined aircraft aluminum casing is virtually indestructible. Its high-capacity alkaline button cells allow it to run longer—and stay brighter—than any button cell keychain LED light. Run time: up to 96 hours.

The Key-Mate also offers many "extras" that set it apart from other lights:

- Versatile powder-coated spring steel pocket clip
- Weatherproof – O-ring sealed
- Rotary head switch. Little chance you'll accidentally turn it on.

Plus, the Key-Mate is a convenient tool. Snap the breakaway lanyard around your neck or wrist. Use the snap hook with swivel for quick attachment/detachment from your belt loops, backpack, zipper pull, or key ring. And its powder-coated spring steel pocket clip lets you clip it to just about anything.

The tiny, durable, powerful Key-Mate. Ideal for work, auto, and home.

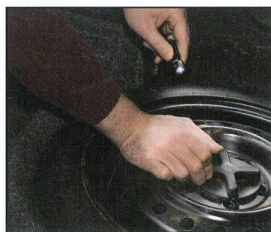

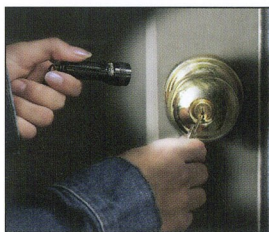

- Super-bright 100,000-hour LED
- Virtually unbreakable machined aircraft aluminum
- Runs longer and stays brighter than any other button cell powered keychain LED light (with focusing optics)
- Runtime: up to 96 hours
- Lifetime warranty

LED available in white, blue, or green
