SETINA | 2016 EQUIPMENT

SETINA

MANUFACTURING

Setina Manufacturing Company is Proud to Celebrate Over 50 Years of Innovation

SETINA IS COMMITTED TO YOUR FLEET NEEDS

Founded in 1963 by John Setina, who had 17 years experience working with the Washington State Patrol Automotive Division, and in owning an auto body repair business before being recruited by the State Patrol.

John Setina - with his inventive spirit and exceptional engineering ability saw the important need for officer protection while transporting prisoners, in addition to vehicle reinforcement. Working tirelessly on his idea evenings and weekends in his garage, John designed the first Setina product and received his first patent, with many other patents to follow.

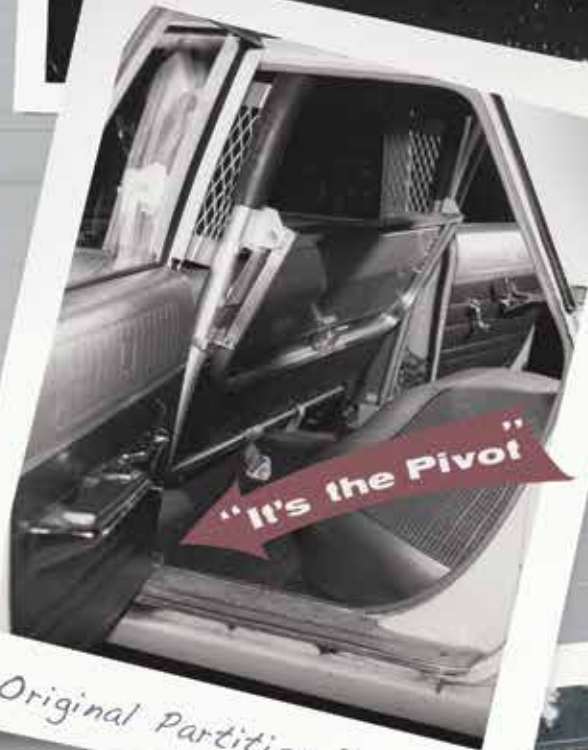

John Setina in his workshop

HIS LEGACY CONTINUES

Although John is no longer with us, his legacy continues with the integrity and old-fashioned family values he so strongly believed in. Setina Manufacturing Company carries on as one of the most respected names in law enforcement equipment, setting industry standards through technological advances and innovative design.

OVER 50 YEARS OF EXCELLENCE

SETINA

Dear Law Enforcement Community

It is our pleasure to share with you the latest in 2015-16 Setina Featured Fleet Equipment brochure. Much like the direction of our company, the past 52 years, our new edition points toward the future of Law Enforcement, but also remembers the past. You will notice products ranging from the new cutting-edge, to the tried and true.

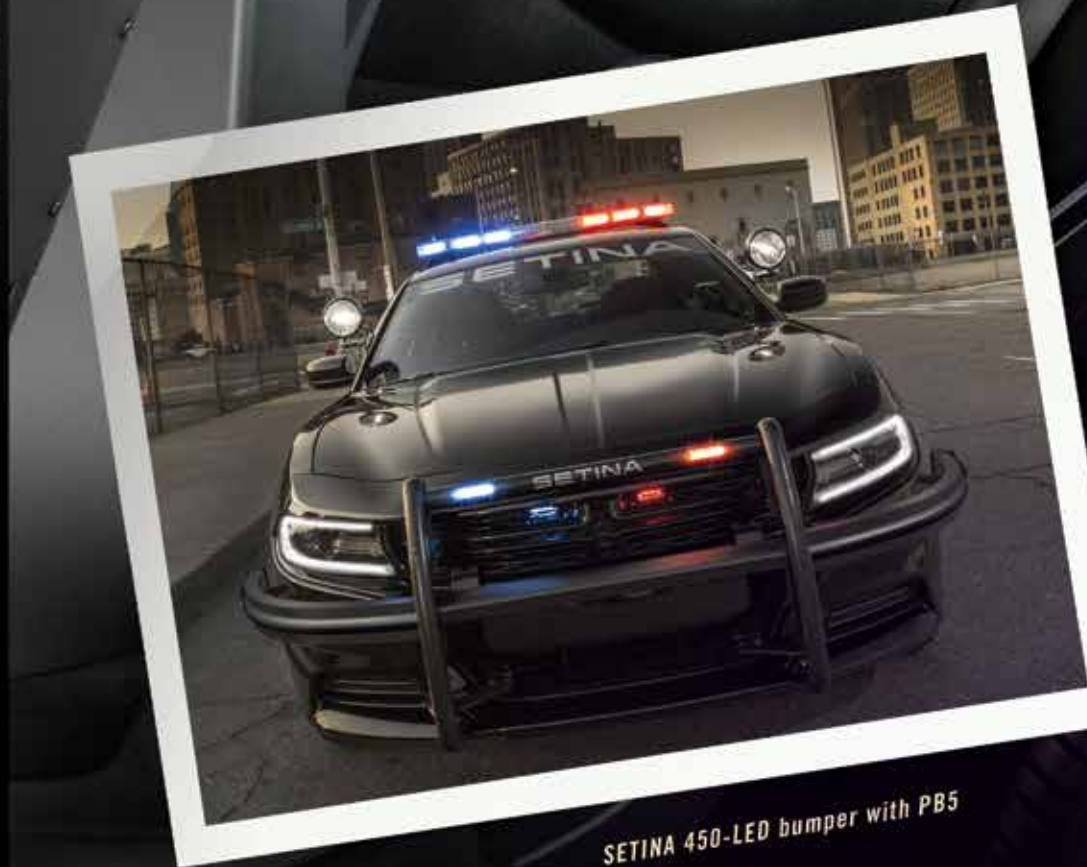

This year we are introducing several new products

Thank you for taking the time to discover the new products Setina has to offer and strongly believe that you too will agree that these products are the best to be found. We very much appreciate the long-lasting and trusting relationships that have been forged over the past 52 years, and look forward to what the next 50 years hold.

Sincerely,
Setina Manufacturing

SETINA STYLES DRIVE THE INDUSTRY

Patent No. 7,726,688
8,708,388

"XL" Does it All! Our Most Popular Design

Recessed Panel design with Xtra Legroom. Our unique Suspended Mounting System anchors securely to the vehicle's B-Pillar eliminating the need for floor mounting brackets or the passenger side lower framework leg. Providing rear passenger Xtra Legroom and No Foot Obstructions. Unique Open Contoured Design makes prisoner loading and unloading easy.

PARTITIONS AVAILABLE IN SEDAN SIZE MODELS AND "VS" VAN, SUV AND TRUCK MODELS

(MODELS #5 AND #9 AVAILABLE IN SEDAN FLAT BLACK ONLY)

("XL" AND "VS" MODELS INCLUDE LOWER EXTENSION PANELS)

NEW! "Rigid Design" in Side Curtain Airbag Compatible Mounting Systems

Setina is devoted to Constant Research and Technological Advances to engineer cutting edge Side Curtain Airbag Compatible mounting designs.

Our "Newly" Designed and Laboratory Tested, "Rigid" $\frac{1}{4}$ " Polycarbonate Panels provides law enforcement Side Curtain Airbag Compatibility along with the added strength of our original $\frac{1}{4}$ " polycarbonate design that was standard on previous mounting systems.

Our unique Suspended Mounting System anchors securely to the Vehicle's B-Pillar, eliminating the need for floor mounting brackets. Providing rear passenger legroom and no foot obstructions.

Setina Mounting Systems are designed for Quick, Easy Installation, mounting to the strongest points inside the vehicle. Creating Space Saving efficiency for maximum driver and passenger legroom.

And SUV's Partitions*

AIRBAG COMPATIBLE SYSTEMS

Setina original Partition designs for SUV series Laboratory tested to flex away from deployment zone while remaining attached to the Partition.

Patent No. 7,726,688

SETINA XL PARTITION

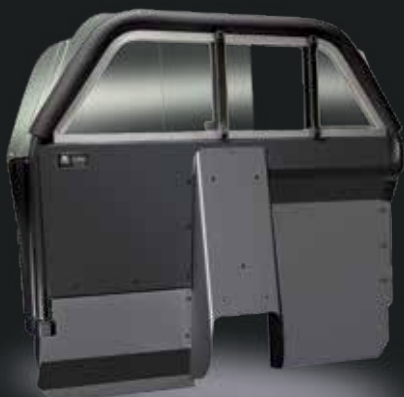

Setina's "XL" Xtra Legroom Partition Design

Our Most Popular Design

Setina's line of Patented Side Curtain Airbag Compatible Partitions. Based on our popular Space-Saver, "RP" recessed Panel design with Xtra Legroom. Our Suspended Mounting System anchors to vehicle's B-Pillars, eliminating partition floor mounting brackets with no foot obstructions in vehicle foot well area.

Maximum Clearance for Entry and Exit

Unique Open Contoured Design provides officer with the easiest prisoner loading and unloading. Recessed storage panel between front seats provides extra space for consoles, mounting vertical gun locks and other accessories and gear.

Patent No. 7,726,688
8,708,388

"XL" Xtra Legroom

Modified steel framework provides strength with no leg obstructions for maximum design strength. Enlarged passenger side back panel recess also provides additional leg and foot room that prevents foot entanglement and offers maximum leg room for both officer and prisoner.

Precision Mounting is a Critical Part of our Design

Setina's "BodyGuard" Partitions are Professionally Designed for maximum strength, durability, and ease of Installation. All Partitions feature welded and formed steel construction, heavy duty roll bar style framework, and are finished using a multi-step powder coat process for added durability.

Superior, Laboratory Tested Side Curtain Airbag Compatible Mounting Systems are designed to mount to the strongest points inside the vehicle. Creating Space-Saving efficiency for maximum driver and passenger legroom.

Coated Scratch-Resistant Polycarbonate Lexan® is the Standard in Setina Partition Windows and recommended to our Customers, to prolong the life and clarity of your window, and comes with a 10 year manufacturer's warranty against breakage.

Focus on Detail

Setina has an unmatched Attention to Detail in our Uncompromising Designs. Only Setina "BodyGuard" Partitions come Standard with Rubber Covered Window Support Bars on most partitions and Rubber Covered Lock Assemblies.

Vinyl Coating is also standard on most of our Expanded Metal Windows.

SINGLE & DUAL PRISONER TRANSPORT SYSTEMS

Single Prisoner Transport

Single Prisoner Transport units provide a secure area to hold the detainee, while maximizing driver comfort as well as accessory storage.

Only Setina Single Transport units retain the full roll bar-type framework design, for structural integrity.

Also, only by Setina, is our unique S-Bend design positioning the unit further back on the Driver's side than on the Passenger Side, with no obstruction to the Driver's seat travel. The S-Bend is standard on SPT units for Sedans and Mid-Sized SUV's.

Available with Scratch-Resistant Polycarbonate Lexan® or Vinyl Coated Expanded Metal Front and Side Windows.

SUV's Require Model #12 Rear Compartment Partition (Not Included)

Dual Prisoner Transport

Full partition seat back panel allows Dual Prisoner Separation and Dual Prisoner Transport.

Divider Wall Panel Kit

Divider Wall Panel Kit, converts existing partitions to Single or Dual Prisoner Transport.

Single Transport Seating System

Advanced design "TPO" Single Prisoner Transport Seats are easily installed and fit right over the vehicle's existing rear passenger side seat.

When the Single Prisoner unit is installed with the "TPO" seat, floor pan and door panels, it gives your vehicle an OEM factory appearance.

SINGLE PRISONER TRANSPORT PACKAGE

Half partition seat back panel leaves open space for recline of driver's seat and rear seat equipment storage while containing a single prisoner. Available: scratch-resistant polycarbonate or vinyl coated expanded metal front window.

Precision Design for Quick, Easy Installation

Full partition seat back panel with divider wall allows dual prisoner separate and dual transport.

DIVIDER WALL PANEL KIT

Converts existing partitions to single or dual prisoner transport.

*Single Prisoner Partition
Front view*

MAINTAIN YOUR FLEET DON'T STORE YOUR SEAT

Precision Fit is Part of Our Heavy Duty Slip Cover Design

Setina's seating systems are the Next Generation of prisoner transport seats.

The "TPO" seating systems are easily installed with a precision fit right over the vehicle's existing seat. Unlike other models, there is no longer the expensive need to remove and store the factory seat.

Designed to maintain Optimal Rear Seat Occupant Placement, that is a critical part of The Automaker's Engineered Airbag Deployment Systems.

Center Pull Seat Belt System eliminates the need for the officer to reach across the Suspect, when belting, significantly reducing officer contact with rear passenger.

Molded seat back recess provides additional space for the suspect's handcuffed arms.

Heavy Duty, moisture and pathogen resistant "TPO" polymer encloses and saves the factory seat, for easy biohazard cleanup. Ideal for contraband control.

Setina's "TPO" Seat and Floor Plan, along with Our "TPO" Door Guards, gives your vehicle an OEM factory appearance.

SUV Models include a Rear Cargo Compartment Partition. Available with Vinyl Coated Expanded Metal, Square Punched Steel or Coated Scratch Resistant Polycarbonate.

ADVANCED "TPO" TECHNOLOGY

WHAT IS TPO? "TPO" or Thermoplastic PolyOlefin is the highest automotive grade polymer (plastic) used as "the standard" by the auto industry. "TPO" is shatter, flame and chemical resistant and exceeds NHSTA regulations. It is far superior to ABS plastics.

T R A N S P O R T S E A T I N G

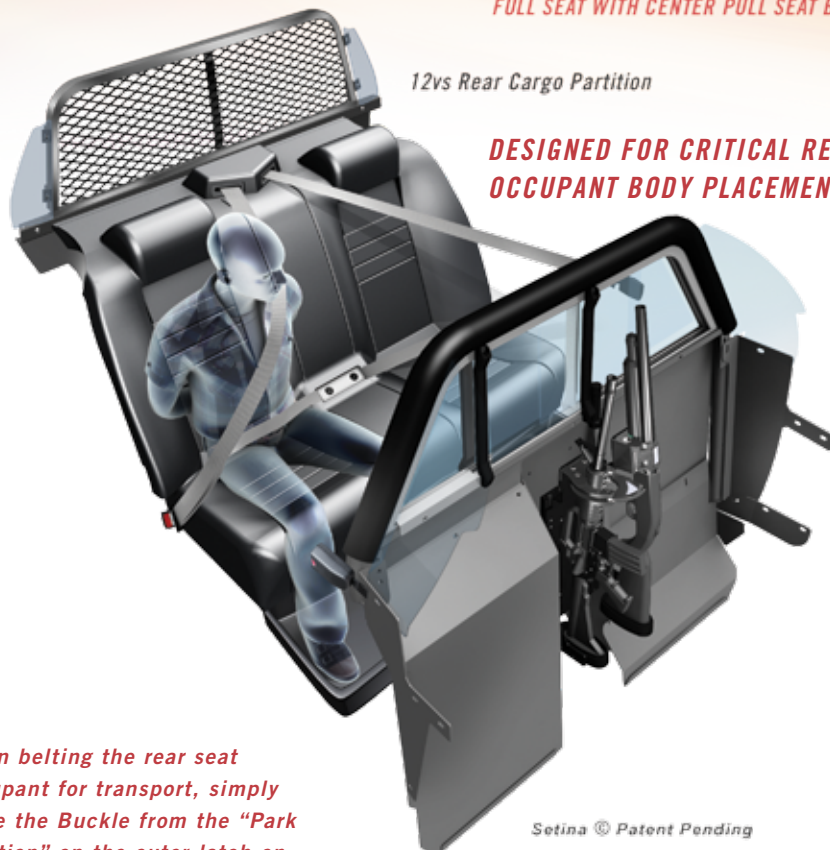

CENTER PULL SEATBELT SYSTEM

FEDERAL MOTOR VEHICLE SAFETY STANDARD 207/210 COMPLIANT SEAT BELT ASSEMBLY

- Professionally Designed and Laboratory tested to meet the rigorous 207/210 FMVSS Seat Belt Standards
- Maintains OEM's Body Position for Safe Airbag Deployment
- First Seat and Belt System Designed for Officer and Occupant Ease and Protection
- Two ERL/ALR Retractors Certified and Tested for FMVSS 209

FULL SEAT WITH CENTER PULL SEAT BELTS

12vs Rear Cargo Partition

DESIGNED FOR CRITICAL REAR OCCUPANT BODY PLACEMENT

When belting the rear seat occupant for transport, simply move the Buckle from the "Park Position" on the outer latch on the Transport Seat.

Setina © Patent Pending

SETINA

FMVSS 207/210 COMPLIANT CENTER PULL SEAT BELT SYSTEM

Setina's Center Pull Seat Belt System is uniquely designed for the seat belt buckle to be docked in the "Park Position" on the prisoner partition when not in use.

When belting the suspect for transport, the officer simply moves the buckle from the "Park Position" on the partition to the outer receptacle on the transport seat, eliminating the need to reach across suspect, significantly reducing officer contact with the rear passenger.

REAR OCCUPANT BODY PLACEMENT

Proper Rear Seat Occupant Placement is a critical part of The Automaker's Engineered Airbag Deployment Systems.

Unlike other seating systems, Setina's Advanced Airbag Compatible Design maintains the Optimal Rear Seat Occupant Zone and retains the factory rear seat.

PRECISION FIT

Setina's "TPO" Seating Systems are easily installed with a "Precision Fit" right over vehicle's existing seat. Unlike other seats there is no longer the expensive need to remove and store your factory seat.

DESIGNED FOR EASY INSTALLATION

Park Position

SUV Models include a Rear Cargo Compartment Partition, Available with Vinyl Coated Expanded Metal, Square Punched Steel or Coated Scratch Resistant Polycarbonate.

SETINA

NEW! Stand Alone Contour Prisoner Transport Seating Systems

FROM SETINA

You Asked, We Listened!

Now in addition to our Original, Precision Fit, Seat Cover design. Setina is now offering our **New!** Stand Alone Contour Prisoner Transport Seating System.

Molded from the same heavy duty, moisture and pathogen resistant "TPO" polymer used in our most popular Precision Fit, Seat Cover models.

Professionally Designed with our Laboratory Tested, FMVSS 210 Compliant, Center Pull Seat Belt System, eliminating the need for officer's to reach across suspect to buckle seat belt.

Molded seat back recess provides additional space for suspect's handcuffed arms.

Contour fit also prevents hiding of contraband and provides increased rear prisoner legroom.

SUV Models require a Rear 12VS Partition. Available with Vinyl Coated Expanded Metal or Polycarbonate Window.

*Stand Alone Contour Seat Systems Require
Removal of OEM factory seat.*

Setina Push Bumpers and Impact Resistant Fender Protectors

Setina Heavy Duty Push Bumpers and Fender Protectors are designed for quick, easy installation. 40% lighter weight, high strength aircraft grade aluminum satisfies the automakers' concerns on front end weight limitations. Three-step, OEM approved primer and exterior finish meets automakers' specifications for maximum durability. Built to perform for law enforcement.

LED Lighted Push Bumper

The PB450-L is completely factory pre-assembled and wired for quick and easy installation. Wiring is protected within the push bumper assembly.

Protect Your Investment

Setina's aluminum undercarriage deflector skid plates protect the under body, power train and chassis components and help reduce potential repair costs from damage incurred during police driving situations.

Our Deflector Smart Design aids in preventing costly damage to vehicle's undercarriage. Simple installation and rock solid protection.

High-strength, lightweight aluminum construction. No drilling required for quick, easy installation.

Not necessary to remove skid plate for routine maintenance.

Setina Headquarters in Olympia, Washington

Built, Designed and Perfected Right Here in the USA

Our Setina American headquarters are where our ambitious engineers and designers create the next generation of law enforcement equipment.

From our three-step powder coating to our uniform assembly systems that ensure perfect fit on all current police vehicles, no part leaves us without thorough testing. For over 50 years our uncompromising adherence to Excellence in Engineering has set the foundation for our designs. In a competitive world, we are proud to set the standards.

See how Setina builds, designs and perfects its products in our US facility.
